Release Plan - Wag More

Major goals for release:

- Be able to have a working prototype of the "app" without bugs

- Successfully implement the Database to handle a dynamically-sized, ever-changing amount of "profiles"

- Have a system where the user can upload photos of themselves and their dog(s)

- Create the Matching Algorithm

- (Potentially) implement real-time location services

- Integrate a Messaging system/API with real-time functionality

- Be able to add a "network" and/or group of friends with dogs

Sprint 1

- (3 points) Create the Database

- (1 points) Create the sign up and login pages

- (2 points) Create the profile creation pages

- (3 points) Implement the upload photos/video system

- (2 points) Make questions for the Matching Algorithm

- (2 points) Create the Interest Image Collage

- (3 points) Implement Location Services

- (8 points) Create the Matching Algorithm (part of it might get bumped to Sprint 2)

Sprint 2

- (2 points) Allow users to browse through matches

- (13 points) Create the Messaging System that allows users to interact with others

- (13 points) Create a system which allows groups of users to add friends and make groups

Sprint 3

- (13 points) Beta test, debug code, polish Messaging System and User Interface

- (13 points) Event reminders

- (21 points) IF TIME ALLOWS, pack into a mobile app!
